

ColourFence Direct

Materials & Delivery Prices

ColourFence Direct can provide fences with or without trellis in four standard colours of brown, green, cream and blue. All four colours or colour combinations are priced the same, but the size and style of the fence will determine the cost.

At 2.35m, our panels are wider than the standard 1.8m so the customer only needs three ColourFence panels to replace four standard wooden panels. Our prices also include posts so bear this in mind when making comparisons. The table below shows standard garden fence heights, but fences can be installed up to 2.1m high and matching gates are also available. Please note that a fence is not just the price per panel, as different locations sometimes require extra rails as well as edge cover strips and other accessories.

We can arrange for delivery or collection, just email us for more information.
